Greenhouse gas (GHG) emissions reduction statement

We have committed to reducing our GHG emissions in line with the 1.5°C goal of the Paris Agreement and achieving net-zero across our value chain by 2050.

Strategy

Our Sustainability Approach, Insperial's Sustainability Strategy, commits us to making a meaningful contribution to UN Sustainable Development Goals (SDGs). SDG 13 Climate Action requires us to take urgent action to climate change and its impacts, including reducing emissions in alignment with global commitments. This statement applies to all entities within Insperial's organisational boundary.

To achieve net zero emissions by 2050, Insperial commits to the following targets:

- Insperial has committed to set near-term company-wide emission reductions in line with climate science with the SBTi. This target will be submitted for validation to SBTi by the end of 2026.
- Insperial will reduce its absolute scope 1 and 2 GHG emissions globally 50% by 2035 from a 2025 base year.
- Insperial will reduce its absolute scope 3 GHG emissions globally 30% by 2035 from a 2025 base year (well below 2°C).

Implementation

All Insperial entities have an important role to play in reaching net-zero emissions. Insperial will:

- Calculate and disclose its annual GHG emissions in accordance with the GHG Protocol and relevant principles of ISO 14064, ensuring consistency, traceability and auditability.
- Develop and implement its GHG Emission Management Plan based on the ACT Step by Step methodology.
- Increase its share of renewable energy across its operations.
- Develop and implement responsible purchasing practices to reduce consumption and minimise waste.
- Engage suppliers and partners to reduce Scope 3 emissions.
- Integrate the GHG Emission Management Plan into policies and systems certified to ISO 14001.
- Monitor progress through defined KPIs and reporting processes and communicate its progress with its clients and internal stakeholders.
- Comply with the reporting recommendations of the Science Based Target initiative.

Governance

This statement is made on behalf of Insperial Group and is implemented across all Insperial operations through policies, procedures and guidance. It is reviewed and approved annually, or more frequently if appropriate.
